The Managing Director
Ikeja Electric Distribution Company
Awolowo way, Ikeja
Lagos.

SP-5343683

~~Dear Sir/Madam,~~

Managing Director,
Ikeja Electric Distribution Company

Dear Sir/Madam,

Request for NERC Approval Copy for ~~Oriola Migration~~ and Reversal of Oriola Feeder Tariff Migration to Band A

We are writing to request a copy of the NERC approval for the migration of Oriola Feeder to Band A, as affected customers seeking to understand the justification and terms of the migration. Please provide the approval document at your earliest convenience.

This letter also follows up on our previous correspondence (dated September 3, 2024, with SR:5322154, and September 6, 2024), where we, on behalf of Oworonshoki residents, strongly objected to the tariff migration from Band C to Band A, resulting in a significant electricity rate increase. Despite our initial communication, we have yet to receive a response or acknowledgment from your office.

We reiterate our demand for the immediate reversal of the tariff to Band C, consistent with the existing service level experienced by residents prior to the disputed migration. This migration was carried out without proper notification or consultation, contravening NERC regulations and consumer protection laws.

We urge you to address this matter urgently and respond to our demands promptly. The

residents are committed to pursuing all available legal and regulatory avenues to ensure their rights are respected and fair billing practices are upheld.

Please confirm your intent to address this issue within 48 hours to avoid further escalation.

Attached to this letter is a signed petition against Band A migration of hundreds of customers across all the streets connected to Oriola feeder.

Thank you for your attention to this matter.

Yours faithfully,

Seun Gbogboade
